## **Advance Payments of Premium Tax Credits & Cost Sharing Reductions**

Michael Kolber, Associate

Alice Lam, Senior Manager

March 19, 2014

#### **Manatt Health**

Manatt Health is a multidisciplinary team of professionals who through deep substantive knowledge and teamwork, support clients seeking to transform America's health system by expanding coverage, increasing access and creating new ways of organizing, paying for and delivering care.

Interdisciplinary team with over 60 professionals with expertise in:

- Medicaid expansion and implementation strategies
- Multi- payer payment and delivery system reform and financing
- Provider risk-bearing strategies, including formation of ACOs and provider-sponsored plans
- Mergers, acquisitions, joint ventures
- Corporate structure and governance
- Privacy and data sharing
- Health information exchange, health IT
- Regulatory analysis and compliance

#### **ACA Glossary**

#### Marketplace:

An online portal where people can shop for health coverage, compare plans, and see if they qualify for financial assistance.

#### **Qualified Health Plan (QHP):**

Private health plans offered on the Marketplace. They must cover a core package of benefits, known as essential health benefits, like prescription drugs and mental health.

#### **Actuarial Value (AV):**

The percentage of enrollees' health care costs that an insurance company is expected to cover.

#### **Metal Levels:**

Type of QHPs offered on the Marketplace that vary in their Actuarial Value. They include Platinum, Gold, Silver, and Bronze.

#### Insurance Affordability Programs (IAPs):

Programs designed to make it more affordable to enroll in coverage and to use health care services. Includes premium tax credits, cost-sharing reductions, Medicaid and CHIP. A single application may be submitted to the Marketplace for all IAPs.

#### **Premiums:**

What a person must pay in order to enroll in health coverage. Premiums are usually paid monthly to the insurer.

#### **Cost-Sharing:**

What a person must pay when they use health services, such as doctors or hospital visits. These costs are often called "out-of-pocket" costs. Cost-sharing represents only part of someone's overall costs for health care, which often also will include premium payments.

The Affordable Care Act creates new coverage options by expanding Medicaid and creating Health Insurance Marketplaces for Qualified Health Plans (QHPs).

Ò

The law includes several programs that help low- and moderate-income people purchase health insurance coverage. Together, they are known as insurance affordability programs.

# Insurance Affordability Programs

Advance Premium Tax Credits (APTC) Cost-Sharing Reductions (CSR)

Medicaid

Children's Health Insurance Program (CHIP)

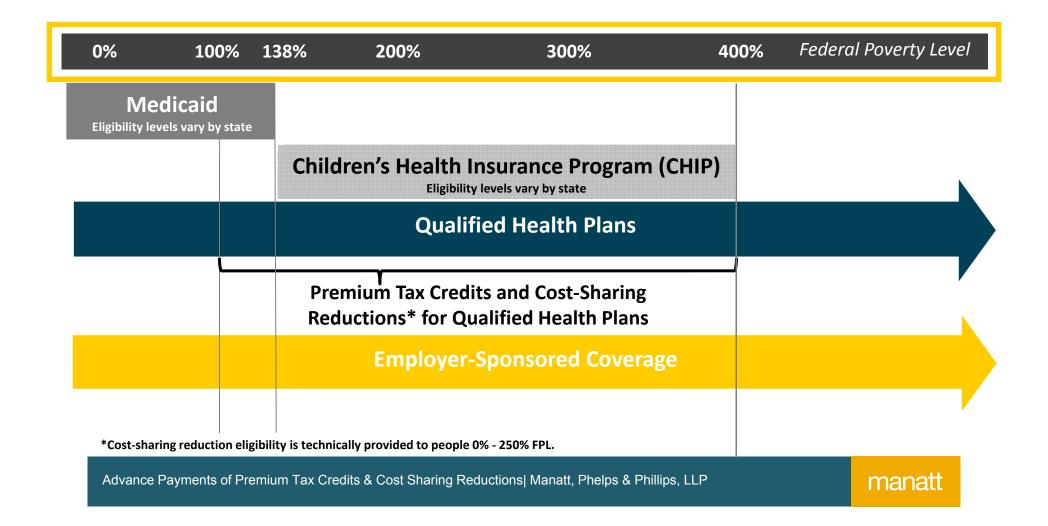

- NEW federal program that uses tax credits to reduce premium costs for QHP enrollees
- For people who meet financial criteria and don't have access to other coverage
- Can be paid in "advance" to provide immediate help in paying premiums.
- IRS reconciles over/under payments of advance premium tax credits when people file taxes

- > NEW federal program
- Helps reduce out-ofpocket costs for enrollees in QHPs
- Payments are made directly to issuers to reduce deductibles, coinsurance and/or copayments (out of pocket costs)
- Existing federal-state health insurance program for low income people
- Expanded to more lowincome adults by the ACA. States can opt out of expansion
- Provides comprehensive health care benefits
- Minimal out-of-pocket costs

- Existing federal-state health insurance program for low- and moderate-income children
- Provides comprehensive health care benefits
- Modest out-of-pocket costs

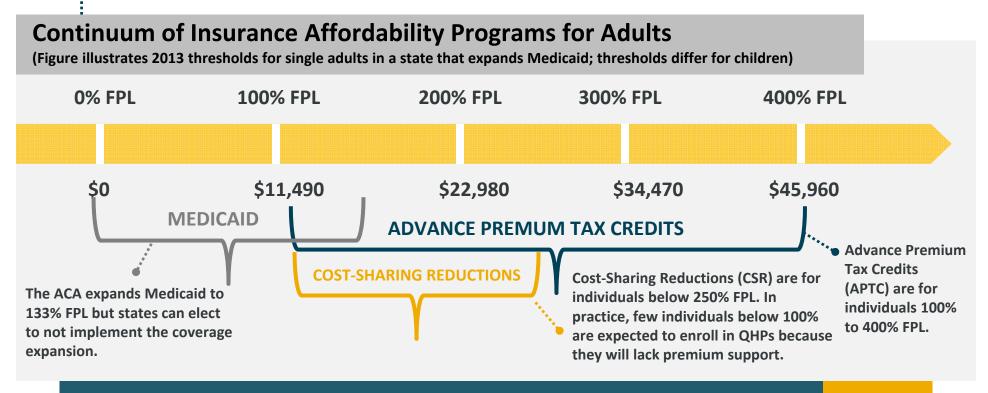

7

The type of health coverage a person receives is based on their income (measured as percent of the FPL) and other factors, like citizenship.

#### **Continuum of Coverage**

- Eligibility for insurance affordability programs falls along a continuum based on income, age, and other eligibility factors.
- On this continuum, income is measured as percent of the federal poverty level, or FPL.
- Children qualify for Medicaid and CHIP at higher income levels than their parents. As a result, families may have members in more than one insurance affordability program.

#### **Federal Poverty Level (FPL)**

The federal poverty level is used to identify who qualifies for insurance affordability programs.

#### **2013 Monthly Federal Poverty Level Guidelines**

(all states and DC except Alaska and Hawaii)

Household Size	100%	133%	150%	200%	300%	400%
1	\$957	\$1,273.48	\$1,426.25	\$1,915	\$2,872.50	\$3,830
2	\$1,292.50	\$1,719.03	\$1,938.75	\$2,585	\$3,877.50	\$5,170
3	\$1,627.50	\$2,164.58	\$2,441.25	\$3,255	\$4,882.50	\$6,510
4	\$1,962.50	\$2,610.13	\$2,943.75	\$3,925	\$5,887.50	\$7,850
5	\$2,297.50	\$3,055.69	\$3,446.25	\$4,595	\$6,892.50	\$9,190
6	\$2,632.50	\$3,501.23	\$3,948.75	\$5,265	\$7,897.50	\$10,530

The Marketplace and Medicaid agency use different timelines to determine federal poverty level.

Source: Annual Update of the HHS Poverty Guidelines, 78 Fed. Reg. 5182 (Jan. 24, 2013). Medicaid eligibility based on 2014 FPL.

Background

Big Picture: The Marketplace

Deeper Dive: Advance Premium Tax Credits

Deeper Dive: Cost-Sharing Reductions

#### The Marketplace

- Marketplace offers a "one stop shop" for consumers to compare health insurance plans, apply for coverage (with or without financial assistance), and enroll.
  - Each state can establish its own Marketplace or rely on the federal government to operate one on its behalf.

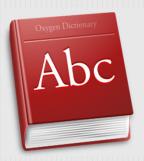

#### What's Offered on the Marketplace?

QHPs are health insurance plans offered by private issuers on the Marketplace

All QHPs must offer the same set of core benefits known as "essential health benefits"

Metal Levels: The Marketplace offers four categories of QHPs, known as "Metal Levels". The metal levels are distinguished by the share of healthcare costs QHPs are expected to cover.

"Actuarial Value" (AV): The percentage that insurance companies will pay on average for the health services consumers use. Consumers will have to pay the balance through co-insurance, co-pays, and deductibles.

**Other Plan Options:** The Marketplace also offers non-Metal plans, such as catastrophic plans. ATPCs cannot be applied to catastrophic plans.

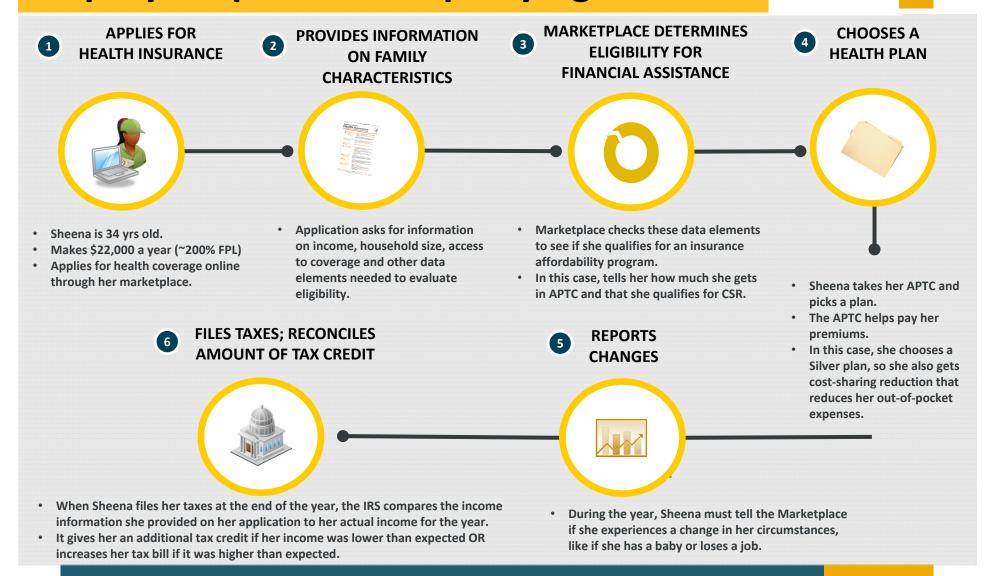

#### **METAL LEVEL PLANS**

- Platinum: Expected to cover 90% of the cost of benefits on average (90% AV)
- ➤ **Gold:** Expected to cover 80% of the cost of benefits on average (80% AV)
- Silver: Expected to cover 70% of the cost of benefits on average (70% AV)
- Bronze: Expected to cover 60% of the cost of benefits on average (60% AV)

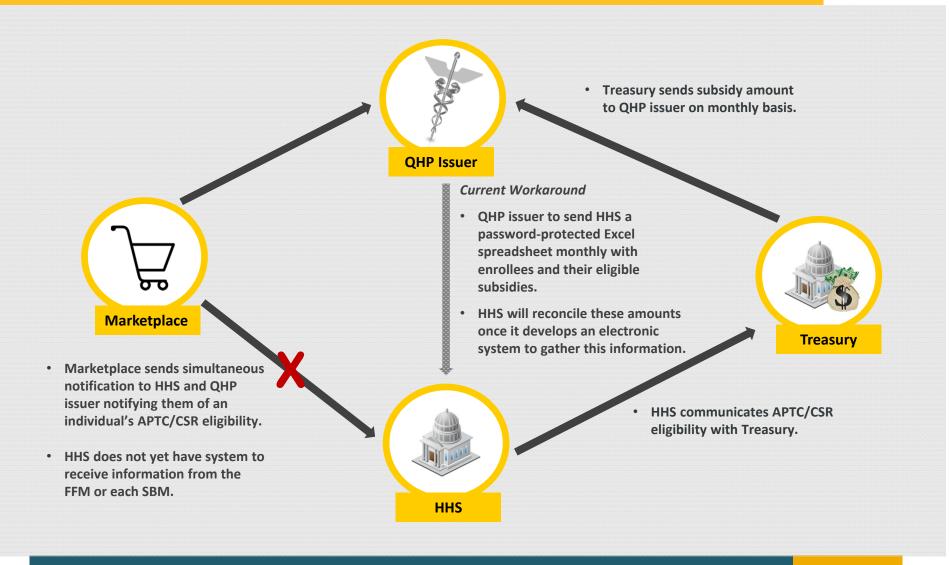

#### **Metal Levels and Premiums**

- Premiums are higher for plans that pay more out-of-pocket medical costs (Platinum, Gold).
- Platinum plans have the highest premiums but the lowest out-of-pocket costs. This means the plan will cover more of the costs when a consumer uses services.
- Bronze plans have the lowest premiums but highest out-of-pocket costs. This means the consumer will have to pay a higher share of costs when he/she uses services.
- People who qualify for a cost-sharing reduction must enroll in a Silver plan to take advantage of it.

#### METAL LEVEL PLANS Platinum: Expected to cover 90% of the cost of benefits on average (90% AV) Premiums paid by consumer Gold: Expected to cover 80% of the cost of benefits on average (80% AV) Silver: Expected to cover 70% of the cost of benefits on average (70% AV) **Bronze:** Expected to cover 60% of the cost of benefits on average (60% AV)

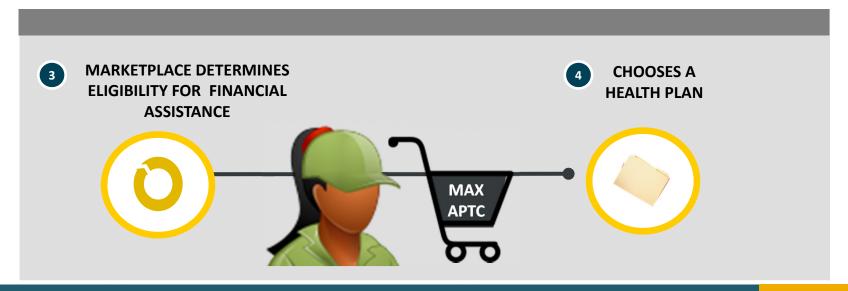

#### **Process for How Government Pays QHP Issuers**

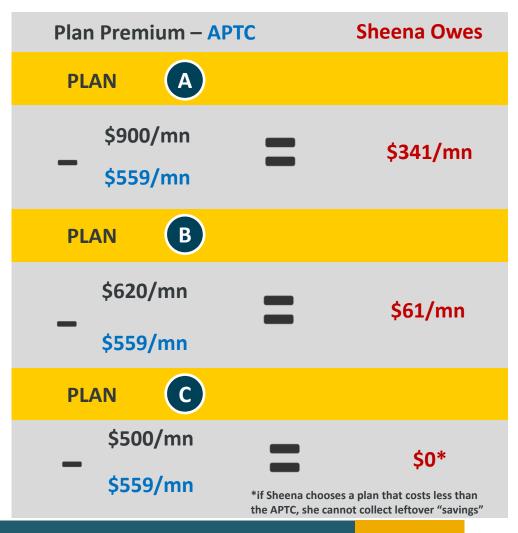

#### **How APTC** is Used to Shop for Plans

- After the Marketplace determines Sheena's eligibility for APTC/CSR, she will be told the maximum amount of APTC she can receive.
- Sheena can then shop around for different plans.
- If she chooses a less expensive plan, the APTC will cover more of the premium costs. If she chooses a more expensive plan, the APTC will cover less of the premium costs, and she will need to pay more on her own.
- As she shops, Sheena may want to consider both her premium costs and her out-of-pocket costs under various plans.

#### Let's See How it Works

- Sheena makes \$22,980 a year, or 200%FPL.
- Her maximum APTC is \$559/month.
- She is deciding between three plans:
  - > Plan A: \$900/month
  - > Plan B: \$620/month
  - Plan C: \$500/month

• Background

Big Picture: The Marketplace

Deeper Dive: Advance Premium Tax Credits

Deeper Dive: Cost-Sharing Reductions

# What is a Premium Tax Credit?

New federal tax credit that will help subsidize the cost of purchasing a QHP on the Marketplace.

#### Available to:

> Low- and moderate- income families who meet financial criteria and other eligibility standards.

#### Two ways to take it:

- In Advance: Families can receive the tax credit on an "advance" basis when they buy their QHPs. Known as an "advance premium tax credit," the credit makes sure that families can receive help without having to wait to file taxes at the end of the year.
- At Tax Filing Time: Families can also front the money to pay their premiums and receive the credit when they file their tax returns. When taken at tax filing, known as a "premium tax credit".

#### Can be used on any metal level plan:

- If buy a relatively expensive plan, the family will need to contribute more of its own funds toward the premium.
- If buy a cheaper plan, the family will have more of its costs covered by the APTC. The APTC cannot exceed the cost of the actual plan.

While families can choose any plan, families with incomes below 250% have an enormous incentive to pick a Silver plan because doing so allows them to receive CSR.

#### Who's Eligible For Tax Credits?

#### Individuals are eligible for an APTC if they:

- Enroll in a QHP
- Have projected annual income between 100% 400% FPL (with exception for legal immigrants)
- Lack access to other coverage that meets some basic standards ("minimum essential coverage")
- Meet various tax-based requirements
  - Plan to file a federal tax return
  - If married, plan to file a joint tax return
  - Not eligible to be claimed as a dependent on someone else's tax return

#### **Special Circumstances:**

#### Households in Which Some Individuals are Not Eligible for APTC:

It is not necessary for every household member to meet the APTC eligibility criteria. If at least one member qualifies, the household can receive tax credits on behalf of the eligible member(s)

#### Special Rule for Lawfully Present Individuals Below 100% FPL:

- Immigrants with incomes below 100% FPL who are lawfully present and ineligible for Medicaid because of their immigration status may be eligible for APTC
- They must also meet all of the other APTC eligibility criteria that apply to individuals with incomes >100% FPL

# Minimum Essential Coverage

Access disqualifies someone from receiving APTC/CSR.

- Basic health coverage that meets minimum standards.
  - Major example include:
    - Individual market policies
    - Job-based coverage that meets "affordability" and "minimum value standards"
    - Medicare, Medicaid, CHIP, TRICARE and certain other coverage.
- With a few exceptions, people are ineligible for APTC if they have access to MEC even if they are not enrolled in it.

#### **Affordability:**

A plan is considered affordable if the person is required to contribute 9.5% of their income or less towards the plan.

#### Minimum Value:

➤ Job-based coverage provides minimum value if it pays for 60% or more of the benefits covered by the plan. Individuals must pay no more than 40%.

# What Does NOT Count as Minimum Essential Coverage

You can still be eligible for an APTC if you have coverage that does not count as "Minimum Essential Coverage"

These limited coverage options <u>do not</u> count as Minimum Essential Coverage:

- Policies that cover only a specified disease or illness (e.g. cancer-only policies)
- Medi-gap policies
- Accidental death and dismemberment coverage
- Disability insurance
- Workers' compensation
- Coverage for employer-provided on-site medical clinics
- Limited-scope dental or vision benefits
- Long-term care benefits

Congress decided how much families are expected to contribute to their premiums. Based on this expected contribution, APTC are set at a level that allows people to purchase a relatively inexpensive Silver plan.

#### Steps the Marketplace Must Take to Calculate the APTC

STEP 1 Determine the

Determine the amount the family is expected to spend on premiums (expected contribution) given its income

STEP 2

Identify the cost of the second lowest cost Silver plan (benchmark plan) for this family

**STEP** 

Fill the gap – after identifying a family's expected contribution, determine how much more it needs to purchase the benchmark plan. The APTC are set at this dollar amount to "fill the gap"

#### **How is the Tax Credit Calculated?**

**Tax Credit** "fills the gap" between what a family is expected to contribute to health insurance and the cost of a benchmark plan.

The **cost of the benchmark plan** is the cost of the second lowest cost Silver plan for eligible family members adjusted to reflect selected characteristics of the family, such as age and size.

The family's **expected contribution** is set on a sliding scale based on income.

It varies from 2% of income at 100% FPL to 9.5% at 400% FPL.

The expected contribution is not adjusted to reflect any additional costs a family might have for buying other insurance, such as employer-based coverage or CHIP.

STEP 1 Identify the cost of the second lowest cost Silver plan (benchmark plan) in the geographic area in which the household resides.

Adjust the cost to reflect the age of the APTC-eligible members; if a family includes older members, it increases the cost of the benchmark plan and, thus, the size of an applicant's APTC.

# How is the Family's Expected Contribution Calculated?

Families are expected to contribute between 2% and 9.5% of their income towards QHP premiums. The percentage they are expected to contribute is based on a sliding scale.

#### To find contribution amount, the Marketplace must figure out:

- Who's in the family?
- 2 How much income does the family have?
- What is the family's income as a percentage of the federal poverty level?

Premium Credits by Income Under Health Reform								
Incon	ne (2013)	Expected Family Contribution						
Percentage of poverty line	Annual dollar amount (2013 \$)	Premium contribution as percentage of income	Monthly premium contribution					
Family of four								
100 – 133%	\$23,550 - \$31,322	2%	\$39 - \$52					
133 – 150%	\$31,322 - \$35,325	3 – 4 %	\$78 - \$118					
150 – 200%	\$35,325 - \$47,100	4 – 6.3%	\$118 - \$247					
200 – 250%	\$47,100 - \$58,875	6.3 – 8.05%	\$247 - \$395					
250 – 300%	\$58,875 - \$70,650	8.05 – 9.5%	\$395 - \$559					
300 – 350%	\$70,650 - \$82,425	9.5%	\$559 - \$652					
350 – 400%	\$82,425 - \$94,200	9.5%	\$652 - \$746					
Individual								
100 – 133%	\$11,490 - \$15,282	2%	\$19 – \$25					
133 – 150%	\$15,282 - \$17,235	3 – 4%	\$38 – \$57					
150 – 200%	\$17,235 - \$22,980	4 – 6.3%	\$57 - \$121					
200 – 250%	\$22,980 - \$28,725	6.3 – 8.05%	\$121 - \$193					
250 – 300%	\$28,725 - \$34,470	8.05 – 9.5%	\$193 - \$273					
300 – 350%	\$34,470 - \$40,215	9.5%	\$273 - \$318					
350 – 400%	\$40,215 - \$45,960	9.5%	\$318 - \$364					

# What Happens When Family Members Have Access to Other MEC?

The family's **expected contribution** is not adjusted to reflect any other costs a family might have for buying insurance, such as employer based coverage or CHIP.

Access to coverage outside of Marketplace

The Smiths make \$94,200 each year (400% FPL). Their expected contribution is 9.5%, or **\$746 per month.** 

Ms. Smith has health coverage through her job, which costs **\$500 per month**. No other Smith family members have access to MEC.

\$1,246 per month

in total premium costs

No access to coverage outside of Marketplace

The Smiths make \$94,200 each year (400% FPL). Their expected contribution is 9.5%, or **\$746 per month.** 

Ms. Smith does not have access to coverage through her job, so she pays **\$0 per month**. No other Smith family members have access to MEC.

\$746 per month

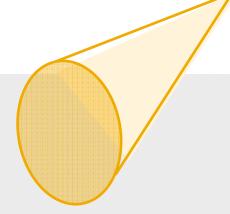

in total premium costs

#### Who's in Your Family?

#### **HOUSEHOLD SIZE**

The Marketplace uses IRS rules to decide who is in a household.

**General Rule:** A taxpayer's household includes the individuals for whom he/she claims a deduction for a personal exemption.

The Details: A taxpayer may claim a personal exemption deduction for:

- Himself/herself
- His/her spouse
- His/her tax dependents

#### Let's Take this Example:

- ➤ If a single mother with two children plans to claim both of them as dependents when she files her taxes, her household size = 3 (herself plus the two children)
- If her ex-husband plans to claim the children on his tax form, her household size = 1 (just herself)

#### **INCOME**

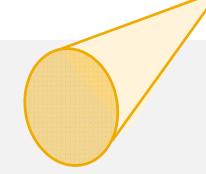

#### Whose Income Counts:

Add up the income of all household members who must file taxes

#### What Income Counts:

- APTC and CSR rely on a measure of income known as "Modified Adjusted Gross Income," or "MAGI"
- ➤ IRS establishes the rules for what counts as MAGI for APTC/CSR purposes
- Two ways to get a person's projected annual income:
  - Option 1: Pull off last year's tax return (Form 1040)
    - Only works if no change in circumstances
    - Line 37 + (if applicable) Line 20A + Line 7 + Line 8b
  - Option 2: "Construct" their MAGI using IRS rules and definitions based on information provided on the application

**Adjusted Gross Income (AGI)** 

Any Social Security benefits (not already included in AGI)

**Tax Exempt Interest** 

**Foreign Earned Interest** 

**MAGI** 

#### Types of Income Included in MAGI

#### **Income Counted**

- Taxable wages/salary (before taxes are taken out)
- Self-employment (profit once business expenses are paid)
- Social Security benefits
- Unemployment benefits
- Alimony received
- Most retirement benefits
- Interest (including tax-exempt interest)
- Post investment income, such as interest and dividends
- Rental or royalty income (profit after subtracting costs)
- Other taxable income, such as canceled debts, court awards, jury duty pay not given to an employer, cash support, and gambling, prizes, or awards; net capital gains (profit after subtracting capital losses); and foreign earned income

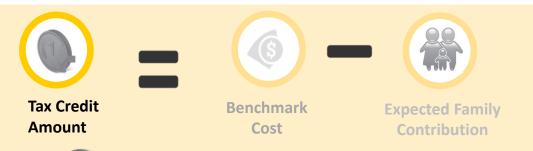

#### **Income NOT Counted**

- Child support received
- Supplemental Security Income (SSI)
- Workers' compensation payments
- Veterans' benefits
- Gifts

#### **Deductions**

- Allowed:
  - Tax deductions allowed on page 1 of the 1040
     Form. For example: student loan interest paid;
     selected higher education expenses (tuition and fees); self-employment tax; alimony payments
- Not Allowed:
  - States' current Medicaid deductions
  - Itemized deductions (like charitable contributions)

### Let's Put it All Together

Mr. Bailey files taxes and lists his wife and two children as dependents. The Bailey family size = 4.

Mr. Bailey and Ms. Bailey have a combined projected annual MAGI income of \$58,875

What's their FPL?

Their FPL is 250%, which qualifies them for APTC and CSR!

BENCHMARK COST: The total premiums for the benchmark plan that would cover all of the Bailey family members is \$17,000 a year.

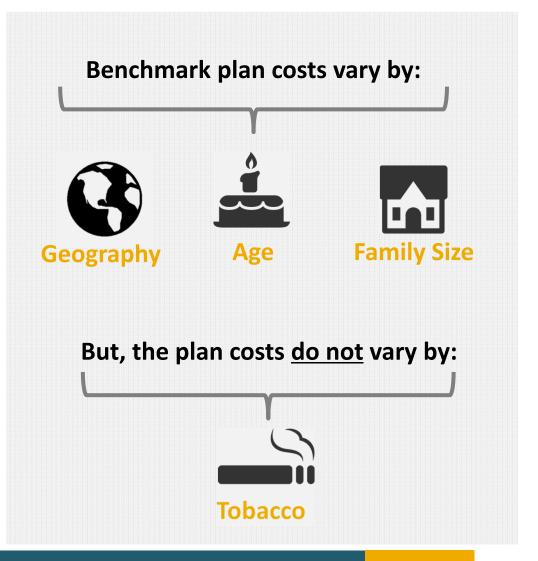

EXPECTED FAMILY CONTRIBUTION: At 250% FPL, The Baileys are expected to contribute 8.05% of their income, or \$4,739 a year (8.05% x \$58,875 = \$4,739).

#### Let's calculate their APTC:

- ➤ ANNUALIZED APTC = benchmark premium (\$17,000) - household contribution (\$4,739) = \$12,261 per year
- ➤ MONTHLY APTC = \$12,261 / 12 months = \$1,022 per month. APTC is paid directly to the Insurer; the Baileys must pay the rest, or \$395/month (\$4,739 / 12 months = \$395/month).

#### Factors that Impact the Benchmark Plan Cost

- REMEMBER: The size of the tax credit equals the Silver benchmark plan minus a family's expected contribution
  - The higher the cost of the benchmark plan, the larger the APTC
  - Benchmark plan costs will change based on where the family lives, the ages of the family members seeking coverage, and the number of household members enrolled in a QHP
  - Even when the benchmark plan changes, the family's expected contribution amount remains the same

#### **How Does Geography Impact APTC?**

#### Where you live matters!

- Issuers can vary plan costs by defined geographic areas
- All issuers need to follow these geographical boundaries when setting rates, but the issuer can decide how much they want to charge per area

#### **Approved Rating Areas:**

States are divided into rating areas by county, zip code, etc.

Example: CA has 9 rating areas, which are split among counties and zip codes

#### Rating areas include:

- Alpine
- Calaveras
- Santa Cruz
- Fresno
- > 912 (zip)
- > 917 (zip)

# Impact of Geography on APTC Size

Meet John. He is 60 and lives in California.

Income: \$22,980 (200% FPL)

**Expected Contribution:** 6.3% or \$121/month

\$792/month

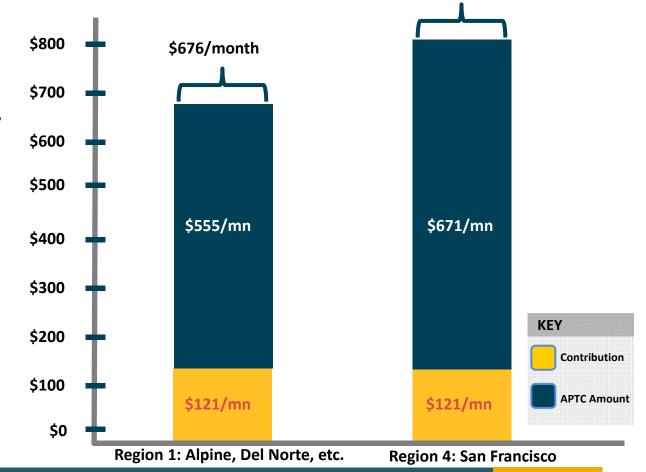

#### If John lived in Region 1 (Alpine, Del Norte, etc.)

- Benchmark Plan: \$676/month
- John's Contribution: \$121/month
- > APTC = \$555/month

#### If John lived in Region 4 (San Francisco)

- > Benchmark Plan: \$792/month
- > John's Contribution: \$121/month
- > APTC = \$671/month

These rates were selected for illustrative purposes. They were adapted from the 6/28/13 Covered California Health Insurance Plans Brochure

#### How old you are matters!

- Issuers can vary plan costs by age
- HHS publishes "age rating curves" for adults.

  The curve shows the amount (rate) that rates vary by age
- The ratio can't be higher than 3:1 and states can pick a lower ratio. This means that older people can never pay more than 3 times as much for coverage as younger people

#### **Approved Age Ratings:**

21
years old

- Rating factor = 1.0
- This means they are the reference point

49
years old

- Rating factor = 1.7
- This means they will pay1.7 times as much as a 21-year old

65+

years old

- Rating factor = 3.0
- This means they will pay times as much as a 21year old

# Impact of Age on APTC Size

#### Meet Martin, Age 29

- Income: \$22,980 (200% FPL)
- **Expected Contribution:** 6.3% or \$1,448
- **Base Premium (before Age Rate):** \$3,000
- Age Rate: 1.19

#### Meet Whitley, Age 63

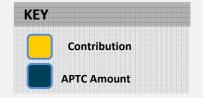

- Income: \$22,980 (200% FPL)
- Expected Contribution: 6.3% or \$1,448
- Base Premium (before Age Rate): \$3,000
- > Age Rate: 2.95

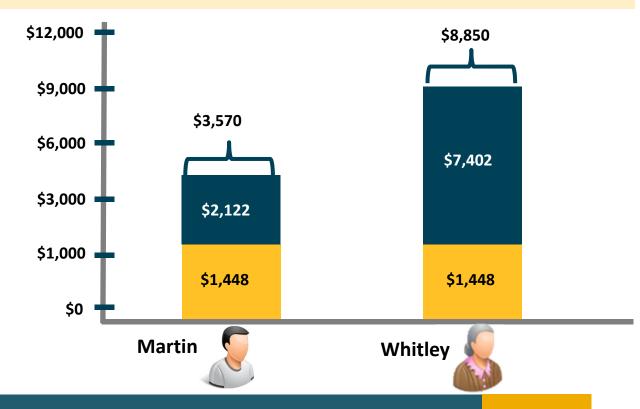

#### Martin, Age 29:

- Premium = \$3,570 (\$3,000 x 1.19)
- Benchmark Plan = \$3,570
- Martin's Contribution = \$1,448
- $\rightarrow$  APTC = \$2,122

#### Whitley, Age 63:

- Premium = \$8,850 (\$3,000 x 2.95)
- Benchmark Plan = \$8,850
- Whitley's Contribution = \$1,448
- $\rightarrow$  APTC = \$7,402

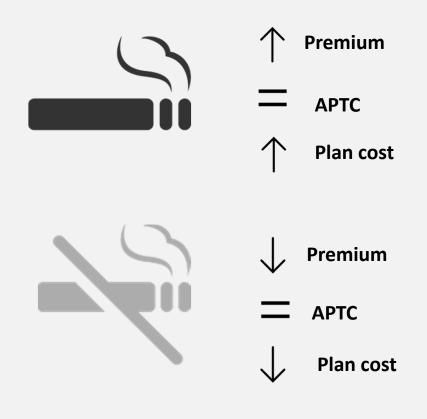

## **How does Smoking Impact APTC?**

#### Whether you smoke matters!

- Plans can charge people more for premiums if they smoke (unless a state prohibits it). A state can allow QHP issuers to charge a smoker up to 1.5 times as much as a non-smoker
- But, tobacco use is NOT taken into account when calculating the benchmark plan. As a result, it does not impact tax credit size
- This means that smokers must use their own money to pay for the higher premium costs associated with their smoking

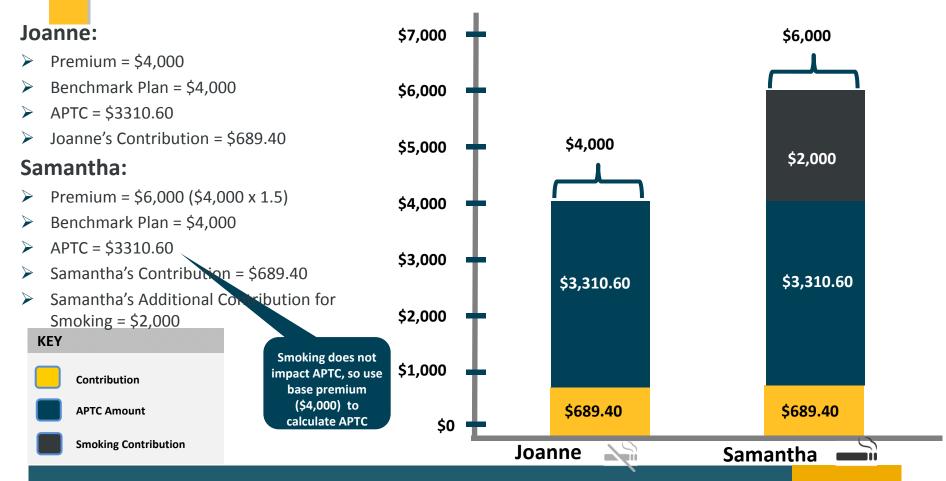

#### **Impact of Smoking on Plan Costs:**

manatt

# Impact of Smoking on Plan Spending

Meet Joanne and Samantha. They are adult sisters who each select the same Marketplace plan. Joanne does not smoke, but Samantha does. Both work at a pizza shop and make \$17,235 (150% FPL). Because Samantha smokes, the health plan can charge her more than Joanne for premiums. In this example, they charge her 1.5 times as much as Joanne.

#### **End of Year Reconciliation**

**Reconciliation:** People who receive an APTC are obligated to file taxes; when they do, the IRS conducts a "reconciliation" to ensure they received the right amount of premium tax credit

If the IRS finds that the individual has to repay credits, there is a cap on the amount they have to pay back. The cap is a sliding scale based on income

#### **Step-by-Step Process for Reconciliation:**

STEP 1

APTC recipients file their annual taxes

STEP

2

IRS uses their tax return income to determine the appropriate size of their premium tax credit for the prior year

**STEP** 

IRS compares the size of the amount they already received in APTC to their actual premium tax credit

- If they received more APTC than their income tax data indicates they qualify for, they must repay the excess (up to a limit). This might happen if someone gets a salary increase in the middle of a year and forgets to report it
- If they receive less APTC than their income tax data indicates they qualify for, they receive a tax refund (or offset to any tax liability). This might happen if someone loses a job in the middle of a year and forgets to report it

# **Reducing the Repayment Risk**

#### Strategies Available to Consumers :

- ➤ **PROVIDE ACCURATE PROJECTIONS**: When applying for an APTC, answer any questions about your projected income and family size as accurately as possible
- ➤ **REPORT CHANGES**: Promptly report any changes in income or family size that occur in the midst of the year; this allows Marketplaces to adjust your APTC to the right level
- TAKE LESS APTC: Consider taking less than the full APTC for which you qualify or even waiting until you file your tax return to take advantage of the premium tax credit if you can afford to "front" the money

#### Example:

For example, consider Suzie who qualifies for an APTC of \$100 a month. She can decide to take an advance premium tax credit of \$50 a month. If she does, she'll also receive a tax refund of \$600 at the end of the year when she files taxes, if it turns out \$100 a month was the correct level of APTC. This helps protect her against the risk that she'll owe money to the IRS at the end of the year if she underestimated her income

# **Special Considerations**

- APTC may only be used for essential health benefits. They can't be used to subsidize the cost of add-ons or optional benefits, like adult dental coverage. Also cannot be used for certain abortion coverage.
  - Example: If a plan costs \$15,000 BUT \$1,000 is attributable to an adult dental add-on, then the APTC will be calculated as if the plan costs \$14,000 (\$15,000 \$1,000).
- The amount of APTC can't be more than the cost of the plan.

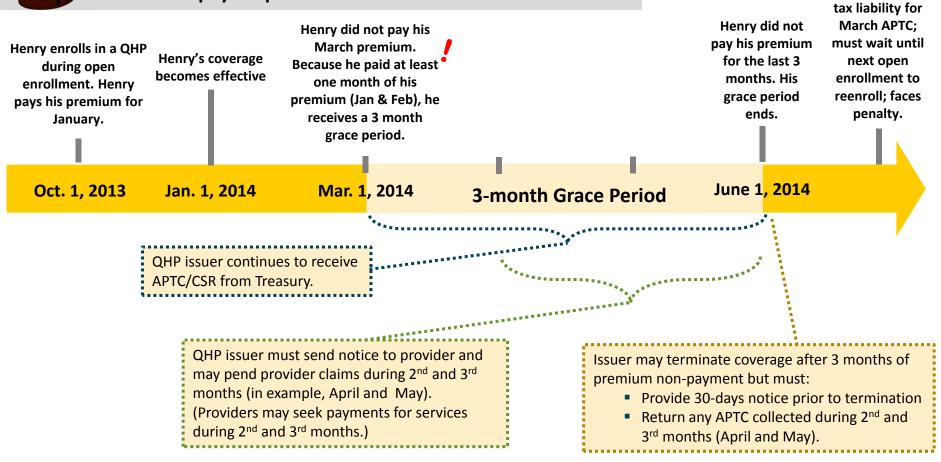

Henry may incur

## **Premium Non-Payment Grace Periods**

Meet Henry. His income is 200% FPL. When he enrolls in a QHP, he is entitled to an APTC. See what happens if he does not pay his premium.

Background

Big Picture: The Marketplace

• Deeper Dive: Advance Premium Tax Credits

Deeper Dive: Cost-Sharing Reductions

## **Cost-Sharing Reductions**

Families are eligible to receive cost-sharing reductions (CSR) to help with out-of-pocket costs (not premiums) if their income is below 250% FPL

The amount of help provided by a CSR depends on a person's income – more substantial help is available to people at lower income levels

People who apply for insurance affordability programs are automatically assessed for CSR

#### Continuum of Insurance Affordability Programs for Adults (Figure illustrates 2013 thresholds for single adults in a state that expands Medicaid; thresholds differ for children) 0% FPL 100% FPL 200% FPL 300% FPL 400% FPL \$0 \$45,960 \$11,490 \$22,980 \$34,470 **MEDICAID ADVANCE PREMUM TAX CREDITS** Advance Premium Tax Credits Cost-Sharing Reductions (CSR) are for (APTC) are for individuals below 250% FPL. In individuals 100% The ACA expands Medicaid to **COST-SHARING REDUCTIONS** practice, few individuals below 100% to 400% FPL. 133% FPL but states can elect are expected to enroll in QHPs because to not implement the coverage they will lack premium support. expansion.

#### 45

# Plan Design Requirements for CSR Variations

After payment of premium and plan enrollment, cost-sharing reductions help people with their out-of-pocket costs like deductibles, coinsurance and copayments.

- Only available to silver plan enrollees
- There are three levels of savings available to people who qualify for a CSR
  - The level of savings (or tier) for which a family qualifies is based on the family's income
  - The issuers provide the extra help with out-of-pocket costs by offering a silver plan with higher actuarial value
    - The higher the actuarial value, the lower the deductibles, coinsurance, and/or copayments
- Every silver plan that a QHP issuer offers must have each CSR silver plan variations
  - Cost-sharing required for any benefit in a silver plan variation cannot exceed the cost-sharing required in the corresponding standard silver plan or in a lower AV silver plan variation.
- Silver plan variants must have the same benefits and providers.

  They may only vary in cost-sharing.

#### **COST-SHARING REDUCTIONS**

Income Range	Actuarial Value of the Silver Plan	2014 Annual Limit on Cost Sharing (Self-only/family coverage)
Special populations < 100% FPL; 100 – 150% FPL	94%	\$2,250/\$4,500
150 - 200% FPL	87%	\$2,250/\$4,500
200 – 250% FPL	73%	\$5,200/\$10,400
>250%	Not eligible for CSR	\$6,350/\$12,700

Notes: Limits are for EHB, in-network coverage only; plans may set lower annual limits but can not exceed these levels

### Let's See How it Works

TYPES OF HEALTHCARE SERVICES

**Meet Ameera.** Use this chart to find out what she will pay out-of-pocket for services at different cost-sharing reduction levels

#### IMPACT OF COST-SHARING REDUCTIONS ON AMEERA'S OUT-OF POCKET COSTS

IF SHE QUALIFIES FOR	TIER 1 CSR Silver Plan: 94% Actuarial Value	TIER 2 CSR Silver Plan: 87% Actuarial Value	TIER 3 CSR Silver Plan: 73% Actuarial Value	NO CSR Silver Plan: 70% Actuarial Value
	<150 %FPL	150% FPL - 200% FPL	200% FPL – 250% FPL	250% FPL +
	Up to \$17,235	\$17,236 - \$22,980	\$22,981 - \$28,725	\$28,726 - \$45,960
Primary Care Visit	\$3	\$15	\$40	\$45
Specialist Visit	\$5	\$20	\$50	\$65
Laboratory Tests	\$3	\$15	\$40	\$45
X-Rays and Diagnostics	\$5	\$20	\$50	\$65
Generic Drugs	\$3	\$5	\$20	\$25

These rates were adapted from the 6/28/13 Covered California Health Insurance Plans Brochure

# Plan Obligations for CSR-Eligible Enrollees

#### Marketplace

Sends QHP issuer electronic enrollment transaction indicating individual's plan selection and eligible CSR level

#### QHP Issuer

Receives individual's plan selection and enrolls individual according to CSR level

Must assign enrollee new cost-sharing variant and credit cost-sharing toward new plan if Marketplace notifies of CSR eligibility change midyear

If QHP issuer fails to enroll individual in correct CSR level, issuer must notify enrollee within 45 days and provide refund

#### **Enrollee**

Receives notification and refund of any incorrectly paid costsharing

Note: There is no obligation for enrollee to repay CSRs if the Marketplace determines individual is no longer eligible for CSRs.

# U.S. Government Pays for Reduced Cost-Sharing

Jan. 1 Benefit Year

Dec. 31

Treasury pays a per member per month amount each month to QHP issuers reflecting estimated CSRs

#### **Benefit Year End**

- Each QHP issuer reports the actual CSRs provided
  - For 2014-2016, issuers may use "standard" or "simplified" method to determine CSRs provided
- Treasury reconciles those amounts with the estimated amounts paid to the issuer during the benefit year

## Who's Eligible For CSR?

#### Individuals are eligible for a CSR if they:

- Meet the eligibility criteria for APTC
- Anticipate annual household income below 250% FPL
- Enroll in a Silver QHP

#### **Special Circumstances:**

# Special Rule for Families with Members who Qualify for Different CSR Levels:

- In families where members qualify for different levels of CSR (e.g. one American Indian (AI) member and one non-AI member), the "least common denominator" rule is used.
- This means that everyone qualifies only for the CSR variation available to the member who qualifies for the least generous CSR.

# Special Rules for American Indian/Alaska Native Populations

#### No Cost-Sharing Obligation Below 300% FPL

AI/AN applicants below 300% FPL are exempt from out-of-pocket costs. They are not required to enroll in a Silver plan to qualify for this "no cost-sharing" protection

#### **Limited Cost-Sharing Obligation Above 300% FPL**

AI/AN applicants above 300% FPL are exempt from cost-sharing for services provided by the Indian Health Service, an Indian Tribe, Tribal Organization, or Urban Indian Organization or through referral under contract health services
